CCGPC, GGSIP University

## **Software Engineer - Quality Assurance**

Alternative Path is looking for Software Engineer - QA to join the team to assist different clients we work with. As a Software Engineer - QA, you will collaborate with our senior engineers on assignments in various departments of the company to define and craft new products and features for our platform, and to improve existing ones. You will have a large degree of independence and trust, but you won't be isolated; the support of the Engineering team leads, the Product team leads, and every other technology team member is behind you. You will bring your projects from initial conception through all the cycles of development: from project definition to development, debugging, initial release and subsequent iteration. You will also take part in shaping the architecture of the product, including our deployment infrastructure, to fit the growing needs of the platform.

This is an opportunity to join a team-first meritocracy and help grow an entrepreneurial group inside Alternative Path. You will be asked to contribute, given ownership, and will be expected to make your voice heard.

**Role: Software Engineer - QA**

**Location: Gurgaon, India (Currently WFH)**

### **Key Responsibilities:**

- Analyze and Interpret business requirements and end user feedback to provide meaningful timely inputs and apply analysis to the testing process.
- Create comprehensive Testing strategies/plans, techniques, approach and test data that you will use to test new features.
- Report defects for the issues found under testing and manage the defect through its lifecycle.
- Create Test cases, test execution and bug reports.
- Automating the existing regression cases at UI and API levels using appropriate tools.
- Collaborate with design and development teams to resolve issues in timely manner and deliver high quality products and contribute to the continuous improvement of the QA test strategy and Processes.

### **Desired Skills:**

- Bachelor's/Master's degree in Computer Science, Software Engineering, or related area.

- Knowledge of software QA methodologies, tools, and processes.
- Knowledge of OOPS concepts, SQL and relational Databases.
- Highly developed analytical, logical reasoning and Problem-solving abilities.
- Strong communication and Presentation skills
- Self-Motivated and Result-Oriented
- Ability to Interact with cross-functional teams.

**Expected Start Date:** Immediate
