## CIRCULAR

It has been observed that some staff & students of the University have installed their own private Wi-Fi Routers in the University Network System. The use of this type of un-authorized hardware are creating a lot of technical issues like looping, bandwidth chocking and also interruption of internet facility in entire or some part of the block/building.

The UITs Cell has already initiated the process to identify these types of issues and it is recommended to stop the use of private Wi-Fi routers. If anyone found to use these types of non-configured devices, their internet access will be disabled.

All the staff and students of the University are requested to take a lead on this issue and prevail upon their peers to refrain from using university internet facility through un-authorized hardware/equipment.
