(Dr. Nisha Singh)
Training and Placement Officer
CCGPC, GGS IP University

About Company:

Publicis Sapient is a digital transformation partner helping established organizations thrive far into the future. United by our shared purpose and our values-driven culture, our 20,000+ people in 53 offices across the world combine expertise in technology, data sciences, consulting, and human-centered experience to design products and services our clients' customers truly value.

Job Description:

Having quick turnaround and increased test coverage is the need of the hour; hence the increased emphasis on automation testing across projects. Publicis Sapient is looking for automation experts who in addition to the expertise in the tools and techniques also have the knack to understand the business needs, ROI and accordingly create the automation strategy. Assures consistent quality of Software Applications production by developing and enforcing robust Automated Software QA strategy, practices, and processes, providing documentation and managing people. They collaborate with the project, business and (QA) teams, to develop detailed automated scripts, test frameworks to make the overall system more effective and efficient for our clients.

Responsible for the overall quality of the project through effective QA leadership and management to ensure the tall deliverables in terms of time, price and quality are met.

This individual must have a proven track record of success building, leading, and managing a functional and technical QA team with a strong sense of quality ownership. This is a hands-on job that requires strategic thinking and planning to provide leadership and expertise throughout the entire QA lifecycle, ensuring the success of the team's manual and automation efforts in an agile working environment.
