Software Engineer Intern Dhwani Rural Information Systems

• FULL TIME

• EXPERIENCE (0-1 YEARS)

• GURGAON

About Dhwani:

[Dhwani Rural Information Systems](http://www.dhwaniris.com) is a Delhi NCR, India headquartered 7+-year-old social/development sector focused advisory and consulting firm. With a robust team of 150+ ICT4D professionals, Dhwani RIS develops IT applications for NGOs, Government functionaries, CSRs, International Funding Organizations, etc. to manage their projects and programs in India and abroad. We are a team of young dynamic, development- conscious tech - enablers and problem solvers consisting of a diverse mix of development professionals, technology enthusiasts, software engineers, and analysts. Our solutions enable organizations to monitor and evaluate their programs for maximum impact and operate seamlessly across everyday operations.

Job Overview:

At Dhwani, we're looking for a software developer intern to join our team and help us create the next generation of products. As a software developer intern, you will be working with our team of developers to create new features and functionality for our products. You will also be responsible for researching and resolving software defects. In addition, you will be assisting with the development of test plans and test cases. To be successful in this role, you should have experience or good technical knowledge of HTML, CSS, JavaScript or Node.js.

Duties & Responsibilities:

- Assist in the development of software applications and components according to specifications
- Assist in the coding, testing, and debugging of new software or enhancements to existing software
- Assist in the documentation of software development process
- Adhere to company standards for quality and productivity
- Understand basic concepts of software development life cycle
- Understand company's business domain
- Have a basic understanding of at least one programming language
- Be able to work independently with little supervision
- Be able to take direction from senior developers and software architects
- Be able to work effectively in a team environment
- Possess strong analytical and problem-solving skills

Required Skills:

- Solid understanding of object-oriented programming concepts
- Experience with at least one major programming language (Java, JavaScript etc.)
- Ability to work independently and as part of a team
- Excellent problem solving and debugging skills
- Strong written and verbal communication skills
- Experience with web development technologies (HTML, CSS, JavaScript, PHP, etc.)

- Experience with databases (MySQL, Oracle, MongoDB, etc.)
- Experience with software development tools (Eclipse, Visual Studio, Git, etc.)
- Familiarity with Agile development methodology
- Good Knowledge of JSON, API and JWT

Educational Qualification:

B-Tech-IT/M-Tech -/MBA- IT/ BCA /MCA or any degree in the relevant field

How to apply:

Interested candidates can apply at : [_____](#)

A silhouette of a person carrying a large basket on their head, set against a warm, orange-toned background. The person is facing away from the viewer, and the basket is filled with what appears to be produce or goods.

WHO WE ARE? OUR MOTIVATION.

01

Mission

Support Social Purpose Organization in their Digital Transformation Journey by enabling adoption of ***affordable, integrated, tailor-made tech*** solutions within their program areas.

02

Why we started Dhwani

Social purpose organizations are aware that without technology they can't scale up operations, but don't know where to start & whom to trust. On the other side the tech companies avoid working in social sector space for various reasons.

CHALLENGES WE RECOGNIZED IN SOCIAL SECTOR

How do I collect data of
5000 farmers
in Maharashtra?

How do I track progress of
Students in a small village
of Rajasthan?

How do I make compliance reports of
10 NGOs
in the same format?

How do I reach to
50000 people online
and educate them about government schemes?

CHALLENGES WE RECOGNIZED IN SOCIAL SECTOR

CSRs

How do I **monitor and evaluate** different programs across different organizations and then create compliance reports?

NGOs

Why is it challenging to track beneficiary-level data and how do I **tell a story** from it?

Government Organizations

How do I **digitize schemes** and track their adaptability in the targeted audience?

Research Organizations

How can I collect offline data in remote villages and how do I **visualise this data**?

CHALLENGES OF SOCIAL-PURPOSE ORGANIZATIONS

Having limited knowledge of

Technology's possibilities and potential

Loss of data and inaccuracies

in data can be caused by manual processes.

Our problems/programs are unique, we need a tailor-made solution, Short-term

Project mode

Lack of social sector **understanding** in tech companies.
