### **About the Company:**

Unicommerce eSolutions is India's largest e-commerce post-purchase management technology platform. Unicommerce provides e-commerce enablement solutions for multichannel selling, inventory management, warehouse management, omnichannel retailing, and marketplace seller management. The platform is designed to meet the business needs of e-commerce and e-tailers across sectors and has served over 15,000 registered customers across India, the Middle East, South East Asia, and South Asia. Unicommerce solution is currently being used by 35K+ users to manage over 2000 stores and 7000+ warehouses and processes more than 500 Mn+ orders amounting to \$5 Bn+ GMV annually. Some of its key clientele include Myntra, Jack & Jones, Tommy Hilfiger, Adidas, Vero Moda, Chumbak, W, boAt, Forever New, Marico, Netmeds, Healthkart, Mamaearth, mCaffeine, Sugar Cosmetics, Lakme, and Nivea among many others.

For more information, visit <https://unicommerce.com/> . Follow Unicommerce on [LinkedIn](#), [Instagram](#) and [Twitter](#). Stay updated with our current open roles across functions and visit our [careers page](#).

### **Product Portfolio:**

1. Advanced **Warehouse management system** (handheld, FIFO picking, cycle count etc. supported)
2. **Multichannel online order and inventory management**, which can be easily integrated with any of the leading ERPs
3. **Omni channel** solution to manage store delivery of online orders
4. **Vendor panels** for stock management across suppliers

**We are looking for a talented candidate interested in a “DevOps - Site Reliability Engineer”. You'll have the opportunity to work with hardworking and talented teams to help develop tools, troubleshoot issues, maintain our infrastructure and provide day to day technical support.**

### **Responsibilities:**

- Build and maintain container native CI/CD pipelines in test/production environments.
- Perform updates and configuration changes to our infrastructure as requested by the development team.
- Work with other members of the DevOps/Engineering team to provide 24/7 technical support on a rotation shift basis, monitoring critical business applications/infrastructure and providing 1st level of troubleshooting.
- Research and experiment with new technologies that can improve day to day operations
- Dive deep into production issues and provide RCA.

### **Skills/Requirements**

- Experience installing and configuring Linux (Ubuntu) OS.
- Familiar with configuring and setting up cloud-based environments, strong desire to expand knowledge in modern cloud architectures.
- Knowledge of scripting languages such as Bash/Shell/Python.

- Understanding of how web applications work at a high level.

**Nice to have knowledge.**

- Kubernetes
- AWS
- Ansible/Terraform/Jenkins/Git
- Mysql/Mongo

**Location: Gurugram, HR**

**Why Unicommerce?**

Be part of a profitable startup on its way to becoming the first ecommerce focused SAAS unicorn of the country.

We process close to 20% of Indian ecommerce volume -- around 400K order items per day, amounting to \$US 1.5+ Bn GMV, which is more than what most of the big marketplaces in India see.

Work on tough distributed system problems (large scale multi-tenancy, distributed coordination, scaling, engineering for high availability under varied workload patterns) in a large scale environment (100 MM hits/day, large clusters comprising 100s of AWS nodes)

Contribute to the evolution of our product portfolio atop our high performing SAAS platform. We help sellers & enterprises around the world automate their ecommerce operations via a suite of products: multi-channel order and inventory management, warehouse & vendor management, omni-channel etc..

Work in a tight-knit high performance team, alongside strong problem solvers graduated from IITs/NITs and other Tier 1 colleges with work experience from companies like Amazon, Microsoft, PayTM, Snapdeal, Makemytrip, Yatra etc. We have a flat hierarchy. Take end to end ownership of business projects and product features.
