Read the passage carefully.

Educational Planning should aim at meeting the educational needs of the entire population of all age groups. While the traditional structure of education has a three layer hierarchy from the primary stage to the university represents the core, we should not overlook the periphery which is equally important. Under modern conditions, workers need to rewind or renew, their enthusiasm, or strike out in a new direction or improve their skills as much as any university professor. The retired and the aged have their own needs as well. Educational planning in other words should take care of the needs of everyone.

Our structure of education has been built up on the assumption that there is a terminal point to education. This basic defect has become all the more harmful today. A UNESCO report certified 'Learning to be' prepared by Edgar Faure and others in 1973 assert that the education of children must prepare future adult for various forms of self learning. A viable education system of the future

should consist of modules with different kinds of functions serving a diversity of constituents and performance not the period of study should be basis for credentials.

In view of the fact that the significance of a commitment to lifelong learning and lifetime education is being discussed only in recent years even in educationally advanced countries, the possibility of idea becoming an integral part of educational thinking seems to be a far cry. To move in the direction means much more than some simple rearrangements of the present organization of education. But a good beginning can be made by developing Open University programs for older learners of different categories and introducing extension services in the conventional colleges and schools. These institutions should also learn to cooperate with community organizations such as libraries, health services etc.

Answer the questions from the 4 choices given against each.

21 – 25 Read the passage below and answer Q No's 21 to 25

I do not recall the exact year when my grandmother and I joined my parents, my brothers and sister in Delhi. My mother had, by then, given birth to another son and daughter. World War I had raised our family from trading, landowning and contracting to dabbling in industry. For its efforts in recruiting soldiers and raising donations for the war chest, it was rewarded with extensive tracts of land irrigated by canals. There was one large block between Mian Channu and Khanewal (now in the Multan district of Pakistan). A small railway station named Kot Sujan Singh between the two still marks the family's presence there. There was another tract of land given to them near Jaranwala in Lyallpur district (now Faisalabad, Pakistan). My grandfather and his two sons put up cotton ginning and spinning mills and oil presses in these towns. My uncle Ujjal Singh, who was the first in the family to go to college and get a Master's degree, was put in charge of the lands and mills in the Punjab.
