Circular

Sub: Precautionary measures in order to prevent breeding of mosquitoes

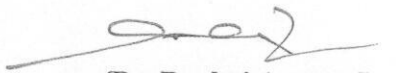

In order to prevent breeding of mosquitoes in and around campus area and vector borne diseases, all employees, hostlers and residents of the University are requested to take following precautionary measures at their end:

1. He/she is to inspect all over head tanks in govt. owned residential and office building. Damaged or broken over head tanks (OHTs) water storage container should be immediately repaired, replaced or demolished.
2. Ensure that there is no water logging at roof tops in the ground areas in and around the premises.
3. The water contained in money plant/bamboo plant kept as show pieces in the residential/official areas should be changed at least once a week after scrub cleaning and check for Aedes breeding.
4. The water contained in the coolers in hostels and residential premises should be replaced after scrub cleaning the cooler thoroughly every week and if not possible to change water, add 2 table spoon of petrol/one tablespoon temiphos granules to prevent mosquito breeding.
5. Condemned items lying in open must be disposed off or covered prior to rainy season to prevent water logging which is prone to mosquito breeding.
6. Solid waste must be disposed off regularly and properly so that no breeding takes place. Do not let broken earthen wares, plastic container, bucket, gallons, disposal cups, bottles, coconut shells, pots, etc. in open as they could be potential breeding sites for mosquito.
7. Wear full sleeve clothes and trousers that cover arm and legs especially during epidemic season to prevent mosquito bite.
8. Use mosquito repellent creams/oils to prevent mosquito bite on exposed body parts during epidemic season.
