Job Description is attached:

About Company:

Backed by Fairfax, we are the fastest growing insurance company in India with a mission to make insurance simple. We are re-imagining products and redesigning processes by building a technology-driven platform to provide customizable products and transparent insurance solutions.

To name a few accolades:

- We have attained a valuation of $3.5 billion in 4.5 years
- We became India's first Unicorn for the year 2021
- We have been called Asia's Best General Insurance Company for 2019 and 2020
- We are a Great Place to Work certified organisation
- We achieved a perfect 5-star rating on Facebook with reviews from over 20000 people for an exceptional customer service
- We recently onboarded the captain himself, Virat Kohli, as our brand ambassador

About Our Technology:

We are the only cloud-based Insuretech company in India with a focused approach towards in-house development. We are using new-age Technologies like Java Microservices, Full Stack, Angular 6, Python, React Native, DB2, Machine Learning, Data Science, Artificial Intelligence, cloud-native architecture in AWS, Azure. We are headquartered in Bangalore and have a strong technology presence in Pune, Trivandrum and Bhubaneswar as well.

You can read up the below articles to understand further:

- Here's how we predict the policy renewal rate with data and AI
- Here's how we provide a 'Zero Touch' insurance experience

Why work with us?

Digit is revolutionizing the insurance space by using Technology. When we see something that could be improved, we work towards inventing the solution. Working at Digit will give you an opportunity to be a part the new domain of insure-tech and cutting edge development.

We invest in our people and provide them with ample opportunities to grow and pursue a career that matches their potential.

We provide a holistic training to each engineering graduate by putting them into professional courses and extensive on the job training. The mentors for all the trainees are seniors in the team with 6 to 20 years of experience in Technology domain. Our trainees from past batches are working on exciting projects related to core development. Some of them are even leading teams and are our future tech-titans!

(Ms. Nisha Singh)
Placement Officer, CCGPC

TRAINEE PROGRAM – DIGIT GENERAL INSURANCE

We are a young organization that is re-imagining products and redesigning processes by building a technology-driven platform to provide customizable products and transparent insurance solutions.

We are looking for young and talented minds who would help us achieve that vision.

Position Summary:
You will be hired as a **Graduate Trainee Engineer** in our Technology Team. The selected students will be confirmed as **Junior Software Developer** after the completion of the training period.

You will get the opportunity to work on the technologies like Java Microservices, Full Stack, Angular 6, Python, React Native, DB2, Machine Learning, Data Science, AI, ML, cloud-native architecture in AWS, Azure.

What will be our expectations?
- Learn all operations, management viewpoints, company policies, and practices that affect each phase of business and collaborate with other teams to meet the company objectives.
- Learn from live cases and business development opportunities.
- Set performance goals and objectives with the upper management.

Want to know if you are the right fit? You most probably are if the answer is yes for the below:
- <u>Business Enterprise Knowledge:</u> You should have the ability to absorb professional knowledge quickly and develop skills related to technical, functional, software and soft skills.
- <u>Communication and Collaboration:</u> You should demonstrate good interpersonal, and collaboration skills.
- <u>Initiative:</u> You should be able to work independently, take initiative and manage a variety of activities concurrently.
- <u>Flexibility:</u> You should be willing to skill up in multiple technologies and their advancements and open to extensive travel as may be required depending upon the position.

What do we promise you?
A fun and friendly working environment where we would celebrate success. We will trust you to do the best for the organization, customer, and yourself. In short, we will not have the mindset of policing you. We will provide you with fast-tracked opportunities to take up higher responsibilities as we grow.
